**Investment:** INVESTMENT TC-C11-i01 – Decarbonization of Industry

**Start date:** 01-06-2023

**Completion date:** 30-06-2024

**Total eligible cost:** 190.000,00€

**Financial support from the PRR and the European Union:** 161.500,00 €

### **Description of the operation, including its objectives and results:**

ITJV has been concerned about the environment for a long time, investing in renewable sources of electrical energy and ensuring a balance in the production of raw materials. Furthermore, we invest in efficient equipment from an environmental point of view. However, there is still a need to move papers from one place to another and perform manual data entry into the computer.

The objective of this project is to completely digitize the company, transferring all processes to the digital environment, including sending orders, invoices, manufacturing orders, payments and mail. In addition to saving many trees and paint, this measure will also bring a significant reduction in CO2 emissions (34.57%), as fewer letters will need to be transported by the company, customers, suppliers and CTT.

### **Co-financing:**
